

Al-Hosseiny Gad Abbas Ezz El-Arab

Software Engineer — Flutter & Embedded Systems

El-Minya, Egypt +20 10 4460 3980 Kareemgad114@gmail.com wa.me/201044603980

TECHNICAL SKILLS

MOBILE DEVELOPMENT

Flutter
Dart

EMBEDDED & IOT

Embedded Systems
C

PROGRAMMING LANGUAGES

C++
Java

WEB TECHNOLOGIES

HTML / CSS
JavaScript

PLATFORMS & TOOLS

Firebase Firestore
Firebase Auth
REST APIs

CERTIFICATIONS

Flutter Development Diploma

Route IT Training Center — 120 hrs

Artificial Intelligence (AI)

NTI · Huawei Egyptian Talent Academy — 80 hrs · 2025

HCIA-AI V3.5

Huawei Talent · 2025

Introduction to Programming using Java

Information Technology Institute (ITI) — 30 hrs · 2024

Cisco CCNA

WE Telecom Egypt · 2023

230+ documented training hours

PROFILE

Software engineering graduate (2026) who builds mobile applications in Flutter and works close to the hardware in C. My graduation project shipped as a full IoT product: live sensor telemetry from Firebase Firestore, remote actuator control, and screens that surface a machine-learning model's output. Also comfortable in C++, Java and the core web stack, backed by 230+ documented hours of formal training.

GRADUATION PROJECT

Smart Farming — IoT Precision Agriculture

2026

My role: the Flutter mobile application — project graded Excellent

- Built the complete **Flutter / Dart client** — navigation, state, theming, and a bilingual Arabic / English interface with light and dark modes.
- Live dashboard streaming **four field sensors** (soil temperature and moisture, air temperature and humidity) from **Firebase Firestore**, each with a status indicator and ideal-range thresholds.
- Implemented **remote irrigation pump control** and a threshold-based alert system with unread / critical filtering and push notifications.
- Sensor history with time-series charts (max, min, average), a **15-day daily report**, and a weather API integration for current conditions and a 5-day forecast.
- Presentation layer for a **Random Forest model**: crop recommendation with match confidence and feature-importance weights, plus a plant-disease risk monitor scored twice daily with a 14-day forecast.

Stack: Flutter · Dart · Firebase Firestore · Firebase Auth · REST weather API · charting · push notifications

EDUCATION

Professional Bachelor's Degree in Technology

2026

New Assiut Technological University

Faculty: Industrial and Energy Technology

Department: Information Technology

Specialization: Software Engineering

Grade: Good (74.5%)

COURSE PROJECTS

Flutter Development Diploma — build track

120 hrs

Route IT Training Center

- Applications built through the diploma: a **To-Do List app**, a **Movie app** and an **E-commerce app**.
- Coursework: Dart principles, OOP, async programming and advanced Flutter topics.
